## COURSE DESCRIPTION

Hospital administration manages all departments to ensure they operate as a whole. In order to manage, schedule, coordinate, direct, and track the effects of medical and health services, their knowledge is needed. With the increase in population, the demand for better healthcare and hospital administration will also increase. Even today, we can observe that many Health projects are being carried out by the government as well as by private entities. This includes Medical colleges, super-specialty hospitals, laboratories, and so on.
