## COURSE DESCRIPTION

This qualification assists in the development of professional competence, increasing learners' ability to help organisations make sensible and proportionate decisions in order to manage risk, meet business objectives, and meet regulatory and other requirements. Thorough but achievable, the qualification is designed by health and safety professionals to meet the needs of the modern workplace. It is a university degree-level qualification, offering a route to Masters-level study. It is a qualification to be proud of.

The qualification covers the practical skills that are essential to health and safety professionals. It assesses learners' ability to apply their skills and knowledge and deliver positive change throughout the workplace. Health and Safety Profession: Increasingly a growing career across all manufacturing and establishment. 50,000+ professionals needed by 2020 in India, Middle East, Europe

## COURSE INFORMATION

The bachelor's degree program in safety management typically takes four years to complete and combines health science and business education to develop a thorough understanding of workplace safety hazards, methods of accident prevention and emergency responses. The program offers safety science courses and many schools offer internship opportunities in professional settings, such as insurance agencies.

In addition to general education coursework, the B.S. in Safety Management curriculum commonly covers topics similar to the following:

- Industrial health and hygiene
- Industrial safety standards
- Safety administration
- Accident prevention
- Safety hazards

Training and certificate programs in safety management are available online or through on-site courses for occupational health and safety professionals. Offered by professional safety management organizations, training often focuses on safety management fundamentals and the business skills involved with safety program administration. Applicants may need a bachelor's degree and several years of relevant work experience in occupational safety.
